

NILESH SHARMA

+1(847)354-3883 | nilesh.sharma05@icloud.com | [Linkedin](#) | [Github](#)

Education

Arizona State University

Tempe, Arizona

B.S. Computer Science — GPA: 3.5/4.0

May 2027

- New American University Scholarship Recipient(\$13.5k/yr)
- Dean's List: Fall 2022 – Spring 2025

Experience

Software Engineering Intern, National Informatics Center

Jun 2025 – Aug 2026

Delhi, India

- Migrated Cabinet Secretariat & Rashtrapati Bhavan infrastructure from .gov.in to .nic.in
- Configured DNS, SSL/TLS, Apache/Nginx, and SEO-preserving redirects achieving 100% audit compliance

Software Engineering Intern, Financial Intelligence Unit

Jun 2024 – Aug 2024

Delhi, India

- Built secure government data transfer application using Swift, Node.js, C#, and MongoDB
- Implemented encrypted communication workflows reducing backend processing latency by 25%

Software Engineering Intern, LTI Mindtree

May 2024 – Jun 2024

Delhi, India

- Developed enterprise web applications using Node.js, PHP, JavaScript, and MySQL
- Optimized SQL queries and automated Linux admin workflows using Bash scripting

Undergraduate Teaching Assistant, Arizona State University

Aug 2024 – May 2025

Tempe, Arizona

- Led weekly labs for 20+ students in C, C++, MATLAB, and engineering coursework
- Mentored students in debugging, algorithms, and systems programming fundamentals

Technical Projects

MiniNetStack | Rust, TCP/IP, Linux ([Github](#))

- Engineered a lightweight network stack implementing Ethernet, IPv4, ICMP, UDP, and partial TCP
- Added packet parsing, checksum validation, SYN/SYN-ACK handling, and TUN/TAP communication

NucleusDB | Rust, Database Systems([Github](#))

- Engineered lightweight database engine with WAL logging, LRU caching, and crash recovery
- Implemented modular storage architecture and efficient buffer pool management

Atlas-AI Agent | Python, FastAPI, React([Github](#))

- Built AI-powered coding assistant with workspace-aware project analysis and async backend APIs
- Integrated real-time frontend interactions with modular file-system operations

Dark Web Leak Intelligence Aggregator | Python, Selenium, Tor, SQLite([Github](#))

- Built automated dark web intelligence crawler using Tor and Selenium for leak discovery and monitoring
- Developed SQLite-backed detection pipeline organizing and tracking 1000+ leaked records
- Designed PyQt6 desktop interface supporting one-click execution, logging, and real-time tracking workflows
- Implemented scalable scraping automation with session handling and fault-tolerant data collection

Technical Skills

Languages: Python, Rust, Java, C, C++, C#, SQL, JavaScript, PHP, TypeScript

Frameworks & Tools: React, Next.js, FastAPI, Node.js, Flask, Selenium, Playwright

Systems & Networking: TCP/IP, Linux, Socket Programming, DNS/SSL, Apache/Nginx

Databases: PostgreSQL, MongoDB, MySQL, Redis, SQLite

Cloud & DevOps: Docker, Git, CI/CD, Bash

AI & Security: OpenAI API, Prompt Engineering, Vulnerability Assessment
